The Story

Suggestive human form as well as the pears' unique character and individuality captivated me to include them in my artwork. Bosc and Italian varieties created expressive images through their shapes, sizes and textures.

My first foray using pears occurred in 2004. The image 'Pear Affair 2' was recognized in an international competition. It was such a powerful and distinctive image that I adopted it as my logo. It speaks of my creativity and sensitivity.

In 2005, I developed a series of pear images for a solo exhibition called 'Interpretations', which encouraged the viewer to explore their emotions and feelings. Future presentations included pears dancing in the rain.

By 2009, I was looking for another unique presentation. Voilà! Pears in the desert. After building a sand box in my studio and with a blue backdrop for the sky, I created these three images. To exploit the edginess of the images, the series was titled 'Dessert Pears'. Other pear images with either a whimsical flavor or elements of romanticism soon followed.
